

Cosmetic Holographic Glitter – Holographic Blue

Cosmetic Holographic Blue glitter consists of precision cut, highly reflective particles of vacuum metallised polyester film. The film is embossed prior to metallising to create an amazing prismatic holographic effect. This glitter offers a wide range of cosmetic application, excellent solvent resistance and good temperature resistance. It satisfies the requirements of Regulation (EC) No. 1223/2009 for Cosmetics and is FDA approved.

| Weight | Composition | CAS No. | CI No. |
|--------|----------------------------|------------|--------|
| 92.0% | Polyethylene Terephthalate | 25038-59-9 | N/A |
| 6.5% | Binder – Polyurethane 33 | N/A | N/A |
| 1.0% | Blue 27 | 25869-00-5 | 77510 |
| 0.5% | Aluminium | 7429-90-5 | 77000 |

| Properties | Value |
|-----------------------------|------------------------|
| Specific Gravity | 1.4 |
| Maximum Process Temperature | 190 - 200°C |
| Thickness | 0.002" (50µm) |
| Coverage (theoretical) | 10.5m ² /kg |

ADDITIONAL INFORMATION

EN71-3 approved
